DETAILED ACTION

1 This action is responsive to the response filed on August 7, 2003.

2 Claims 23-62 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Dias (WO 97/24107) in view of Aaslyng (WO 97/19998), for the reasons set forth in the previous office action in paper No. 16.

Response to Applicant's Arguments

3 Applicant's arguments filed 8/7/2003 have been fully considered but they are not persuasive.

With respect to the rejection based upon Dias (WO' 107) in view of Aaslyng (WO' 998), Applicant argues that there is no motivation and there is no reasonable expectation of success to combine the references.

The examiner respectfully disagrees with the above arguments because the primary reference of Dias (WO' 107) discloses the use of the enzymes in the dyeing composition and particular peroxidase enzymes, which are, used specific as a hydrogen peroxide generating enzyme (see page 38, last paragraph). Aaslyng (WO 998) as a secondary reference clearly teaches that enzymes are used in the dyeing composition for provide improved dyeing composition over the composition that comprises traditional hydrogen peroxide which resulted in damage the hair (see page 2, lines 16-26), and, thus, a person of the ordinary skill in the art would be motivated to incorporate the laccase enzyme as taught by Aaslyng in the dyeing composition of Dias with a reasonable expectation of success for improving the dyeing properties of the composition and protecting hair from damage. Therefore, the prima facie case of obviousness has been established.
